

# AKSHAT PORWAL

## Data Analyst | Machine Learning | Business Intelligence

+91-86042-67603 - akshatporwal.124@gmail.com -    

Data Analyst with hands-on experience across multiple internships developing Power BI dashboards, performing data cleaning, SQL analysis, and machine learning projects. Proficient in Python, SQL, Excel, and Power BI, with a strong focus on transforming raw data into actionable business insights through analytics and visualization.

### EDUCATION

Dr Akhilesh Das Gupta Institute of Professional Studies (GGSIPU)  
Bachelor of Technology in Information Technology (GPA: 8.27)

Expected: June 2028

### EXPERIENCE

- Excelerate**    *Ai Data Analyst Intern*

July 2026 – August 2026

  - Developed user-friendly interfaces using Angular, improving customer satisfaction scores by 18%.
  - Implemented automated unit testing using Jest, increasing code coverage by 30% and reducing production bugs.
  - Collaborated in Agile sprints with cross-functional teams to deliver features on time and improve workflows.
- Thiranex**    *Data Analyst Intern*

June 2026 – July 2026

  - Built machine learning models for customer segmentation and predictive analytics while automating data preprocessing workflows.
  - Cleaned, transformed, and analyzed datasets using Python (Pandas), SQL, and Excel to improve data quality and support decision-making.
  - Built machine learning models for customer segmentation and predictive analytics while automating data preprocessing workflows.
- NASSCOM**    *Trainee Intern*

July 2025 – August 2025

  - Processed and analyzed real-time sensor data from an Arduino and PIR-based smart lighting system to identify occupancy patterns.
  - Implemented event-driven automation logic and evaluated system performance through testing and data analysis.
  - Optimized response efficiency by analyzing sensor outputs and improving occupancy detection accuracy.

### PROJECTS

- Real-Time Chat Application**

Technologies: React.js, WebSocket, Flask, PostgreSQL

  - Designed a real-time messaging platform, achieving 99.5% uptime and supporting over 10,000 concurrent users.
  - Built a secure authentication system using JWT and Flask, enhancing data privacy.
  - Reduced message delivery latency by 30% with optimized WebSocket connections.
- Dynamic Pricing Intelligence System**

Technologies: Python, Pandas, Power BI, Excel, Data Cleaning, Exploratory Data Analysis, Business Analytics

  - Identified revenue optimization opportunities by analyzing retail transaction data, uncovering price-sensitive products through customer purchasing behavior and elasticity analysis.
  - Translated pricing insights into an interactive Power BI dashboard, enabling data-driven pricing strategies and category-wise performance evaluation.
- Amazon Fake Discount Detection System**

Technologies: Python, SQL, Pandas, NumPy, Scikit-learn, Power BI, Streamlit, Git

  - Developed a machine learning model to detect suspicious pricing across 340K+ Amazon product listings using feature engineering, exploratory data analysis, and Scikit-learn.
  - Designed an interactive Power BI dashboard to visualize pricing trends, product performance, and business insights, supporting data-driven pricing decisions.

### TECHNICAL SKILLS

**Programming Languages:** Python, SQL (MySQL), Java  
**Frameworks and Tools:** Pandas, NumPy, Scikit-learn, Power BI, Streamlit, Git, GitHub, Jupyter Notebook, Microsoft Excel  
**Concepts:** Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, Machine Learning, Feature Engineering, Statistical Analysis, Business Intelligence, Predictive Analytics
